

"We're planning for the moon and beyond—Dave Graziosi

But aren't they just shoes? "Yes, only shoes," says Blahnik. "But, if they bring a bit of happiness to someone, then, perhaps, they are something more than shoes."

Why are his shoes so popular? "Yes, they're beautiful. On the other hand, his high heels are always particularly comfortable. They're also costly; prices range from hundreds to thousands of dollars. Maybe the best answer is this: each pair of Manolos is a work of art—like a painting by Picasso.

In his twenties, he moved to New York City and began to design shoes for women. Today, his high heels (often called "Manolos") are known around the world. "Women love my shoes," says Blahnik. "Some never take them off."

What makes their shoes so special? "It's the combination of style, futuristic, different—these are some of the words used to describe Manolo Blahnik's and Dave Graziosi's shoes."

The Shoe Designer

More Than a Shoe?

Stylish, futuristic, different—these are some of the words used to describe Manolo Blahnik's and Dave Graziosi's shoes.

Born to a Spanish mother and a Czech father, Manolo Blahnik grew up in the Canary Islands near north Africa. In his twenties, he moved to New York City and began to design shoes for women. Today, his high heels (often called "Manolos") are known around the world. "Women love my shoes," says Blahnik. "Some never take them off."

But aren't they just shoes? "Yes, only shoes," says Blahnik. "At \$30,000 a pair, moon boots aren't cheap. But to walk in space, you need high-tech boots—like those designed by Dave Graziosi. He and his team are making space boots for NASA."

"We're planning for the moon and beyond," he says.

The largest space boot is the M2 Trekker. These boots are smaller and weigh less than the ones Neil Armstrong wore

to the moon. In them, astronauts can walk comfortably on the moon's rocky surface. M2 Trekkers also protect astronauts from extreme cold and heat. They can be worn in temperatures ranging from -212°C (-350°F) to +177°C (+350°F). They are truly more than just a shoe!

Neil Armstrong was the first astronaut to walk on the moon, in 1969. For space travel, NASA (National Aeronautics and Space Administration) is a U.S. organization responsible

for space travel.

* Neil Armstrong was the first astronaut to walk on the moon, in 1969.

Reading Comprehension

A. **Multiple Choice.** Choose the best answer for each question.

1. Another title for this reading could be

- a. Shoes from Around the World

- b. A History of the High Heel

- c. Two Important Shoemakers

- d. Shoes of the Future

2. People often call Manolo Blahnik's shoes

- a. Canaries b. Manolos c. Picasso's d. Blahniks

3. Which sentence about the M2 Trekkers is NOT true?

- a. They can be worn in very hot or cold temperatures.

- b. Neil Armstrong wore them on the moon.

- c. They cost a lot of money.

- d. Astronauts wear them.

Vocabulary 4. In lines 11–12, we can change On the other hand to

- a. And b. But c. So d. For

Reference 5. In line 25, the ones means

- a. the space suits
b. the temperatutes
c. the M2 Trekkers
d. the boots

B. Classification. Match each answer (a–e) with the person it describes.

- a. Is designing a special boot
b. Needs his shoes to be comfortable
c. Says his shoes are like art
d. Makes shoes that cost a lot of money
e. Says shoes can make people happy

Manolo Blahnik Dave Grazioi

<p>Did You Know? The boots were to the moon in 1969. Neil Armstrong's boots are still there. He had to leave behind so he could bring his heavy boots back to Earth.</p>

20th CENTURY

1700s

40,000 YEARS AGO

Ancient Shoes: This
pair of sandals now
lives in a museum in
Italy, miles from the
7th century BC.

The 1700s: In Europe, shoes called *chapines* are popular with women. These shoes are stylish and beautiful, but they are not easy or comfortable to walk in. Some are extremely high; they also cost a lot of money. Only people with a lot of money can buy them.

40,000 years ago: People in the Middle East and Europe start to wear sandals made of plants or leather. These shoes protect their feet from rocky ground, and cold and heat.

A Matching. Match each word in red with a definition. One word is extra.

Vocabulary Practice

B. Completion. Complete the information using the correct form of words from the box. One word is extra.

beyond futuristic heat pair weight

C. Completion. Complete the sentence using the correct

5. to vary from one point to another

4. well dressed and fashionable

3. making one feel relaxed

2. warmish, or a hot temperature

1. very expensive

D. Completion. Complete the sentence using the correct

form of words from the box. One word is extra.

5. to vary from one point to another

4. well dressed and fashionable

3. making one feel relaxed

2. warmish, or a hot temperature

1. very expensive

E. Matching. Match each word in red with a definition. One word is extra.

F. Word Link. We can add *-Y* to nouns to form adjectives, e.g., rocky, dirty, sunny, smelly.
